**HELI**  
LIFTING THE FUTURE

**h2000** Reliable forklift

**1-3.5t** H2000 series  
Engine Powered Forklift

**h2000** Reliable forklift

**A reliable Drive system**

As the most reliable transmission system produced by Heli, it has been validated by over twenty years' experience in World market. Meanwhile, various auxiliary devices of the power system ensure the reliability effectively.

- ✓ Durable transmission
- ✓ Equipped with the intake system & intake silencer
- ✓ Optional air filter pressure alarm device
- ✓ Automatic engine preheating system
- ✓ Cyclone Air Filter
- ✓ Lost foam casting
- ✓ Various high power engines are available for customers' optional choices, and the emission meets the latest European & American environmental regulation.

**A reliable mast**

The high internal-qualified mast continually ensures the safety of the operator, truck and cargo. Standard configuration of the wide-view mast enlarges operators' view effectively, and ensures loading/unloading operators more reliable.

- ✓ Using the best German steel material for triplex mast (carbon only for triplex mast)
- ✓ The frame of mast has more strength basing on the enlarged channel interface.
- ✓ Clear visibility for standard wide view mast
- ✓ The channel with own patented technology has the first-rate quality.

**A reliable hydraulic system**

HELI has the most professional R&D team of cylinders, where we take advantage of the advanced manufacturing technologies and detecting means to ensure the reliability of all cylinders of the hydraulic system.

- ✓ Standard lift cylinder by Heli
- ✓ Standard lift cylinder by Heli
- ✓ Standard steering cylinder by Heli
- ✓ Self-locking lift cylinder
- ✓ Standard hydraulic circuit filter
- ✓ Speed buffer device on lifting system

**A reliable steering system**

The steering system with new technologies not only provides a smoother steering and faster positioning & steering, but also effectively ensures operators' safety.

- ✓ Wearable tire
- ✓ Smaller turning radius
- ✓ Full hydraulic power steering

**Comfortable operation space**

Large operation space with ergonomic design and configuration ensure the operation more comfortable & convenient, and effectively enhance the efficiency & safety of operation.

- ✓ Filled with noise reducing and buffer rubber material between bonnet and framework
- ✓ Newly patented insulation materials of Bonnet
- ✓ Well designed non-slip mat
- ✓ Special display with easily reading
- ✓ Standard files packet
- ✓ Exhaust system is flexibly connected with the frame.
